LinkedIn — GitHub — LeetCode — Portfolio

Profile Summary

Computer Science Engineering graduate skilled in Java, JavaScript,React.js, Node.js, Express.js, and MongoDB. Experienced in full-stack web development, REST API development, database management, authentication, and CRUD operations. Strong problem-solving skills with 175+ LeetCode problems solved. Seeking Software Developer or MERN Stack Developer roles.

Work Experience

MERN Full Stack Developer Intern — EduSkills Academy *Jan 2026 – Mar 2026*

- Completed a 10-week industry internship covering the full MERN stack, from core JavaScript and React fundamentals through advanced Node.js and backend best practices.
- Built React single-page applications using Hooks, Context API, Redux Toolkit for state management, React Router for navigation, and Tailwind CSS for responsive styling.
- Developed RESTful APIs with Node.js and Express.js, integrated MongoDB with Mongoose for data persistence, and implemented JWT-based authentication and authorization.
- Delivered a capstone e-commerce platform with user management and product catalog features, plus a time series analytics project, following Git-based DevOps workflows for version control and deployment.
- **Certificate ID:** 2026-7FCEA34B48 — **Issued Mar 09, 2026**

Projects

Doctor Appointment Booking System (MERN Stack) GitHub — Live

- Engineered a full-stack Doctor Appointment Booking System enabling patients to discover doctors, view availability, and schedule appointments through an intuitive web interface.
- Implemented secure authentication and role-based access control (RBAC) for patients, doctors, and administrators to ensure protected access and efficient user management.
- Developed appointment scheduling with availability validation, booking management, and cancellation workflows to prevent double bookings and streamline appointment coordination.
- Designed responsive dashboards for managing doctor profiles, patient appointments, and booking records, improving usability and simplifying healthcare appointment administration.

Job Application Tracker Portal (MERN Stack) GitHub — Live

- Built a full-stack job application tracker with JWT authentication and CRUD operations to manage applications across the recruitment lifecycle.
- Developed an interactive dashboard with search, filtering, Kanban-style status tracking and Recharts visualizations.
- Introduced a Recently Deleted (Trash) section with restore, and a notes module supporting PDF and DOCX import.
- Added forgot-password reset and a one-click demo account, and built a responsive UI.

Technical Skills

Programming Languages: Java, JavaScript
Frontend Development: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap
Backend Development : Node.js, Express.js,REST APIs, JWT Authentication
Database: MongoDB (Mongoose), MySQL
Tools & Platforms: Git, GitHub, VS Code, Vercel, Render
Core Concepts: Data Structures Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Education

- **B.Tech in Computer Science Engineering**, Galgotias University *2022–2026*
  CGPA: 7.4/10
- **Class XII**, Laxmi Narayan Dubey College *2020–2022*
  Percentage: 76.8%

Certifications & Achievements

- **Java Foundations** – Oracle Academy
- **AI & Machine Learning** – EduSkills
